

WHY IS HOTEL AKELARRE A SUSTAINABLE AND RESPONSIBLE HOTEL?

ENERGY:

1. We optimise the use of **natural light**.
2. We consume **100% renewable energy**.
3. We have a **domestic hot water system**, and **energy-efficient lighting and climate control**.

SUSTAINABLE PURCHASING:

4. We have **sustainable purchasing criteria in place**, such as the acquisition of equipment that is efficient in both energy and water use.
5. We offer guests **eco-friendly products**, including both food and non-food items.

WASTE:

6. We **reduce waste generation** by using water jugs instead of bottles.
7. We **sort our waste** for subsequent recycling. Guests have access to waste-sorting bins in the common service area for packaging, general waste and organic waste.

WATER:

8. We control the water flow of taps and showers to **prevent water waste**.

SUSTAINABLE TRANSPORT

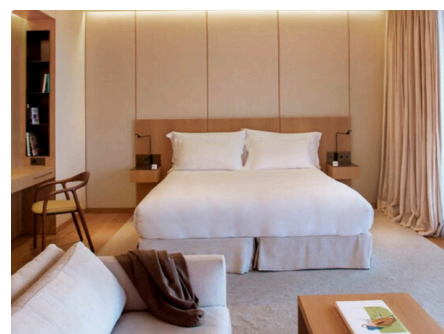

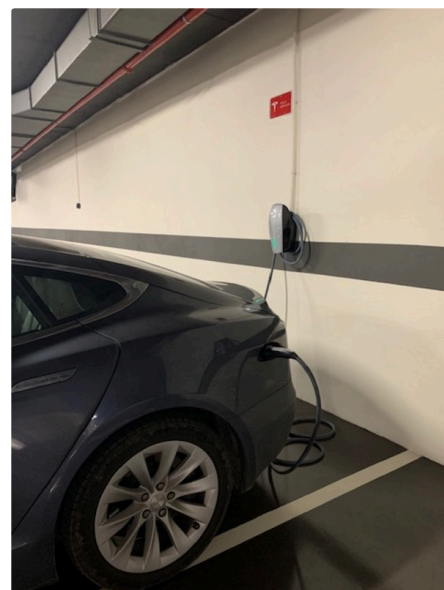

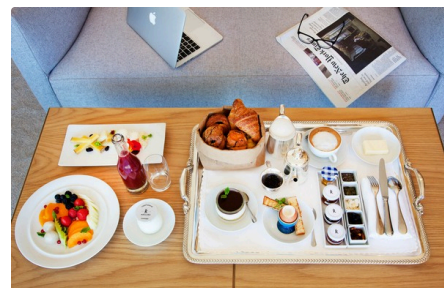

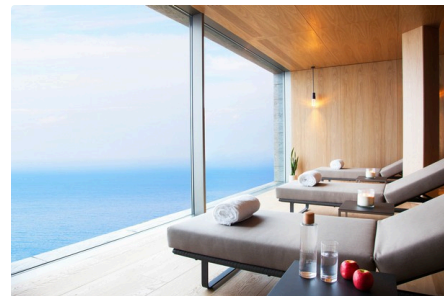

9. We encourage guests to use **sustainable transport**. We have an electric vehicle charging point with two charging connectors.

ACCESSIBILITY

10. Thanks to their size and layout, all rooms make it easy for wheelchair users to move and get around. In addition, the property has a fully adapted room, ensuring appropriate conditions of accessibility and comfort.
11. The Oteiza restaurant is fully accessible, allowing everyone to enjoy its facilities and services on equal terms.

SOCIAL COMMITMENT

12. The property maintains active collaboration with social and third-sector organisations. Among its initiatives, it takes part alongside Wy Not in charity raffles and collaborates with Traperos de Emaús, supporting social and charitable projects and initiatives.

(*) For further information on the sustainable management of the property, please ask at reception. We have a policy, an environmental objectives plan, and an annual internal assessment.
